Database Lab-02 (Inlabtask)

Activity #01

1. Online shopping System → Customers, product, orders, payment, Delivery Details

2. Airline Reservation System → flights, passengers, tickets, seats, payment.

Activity #02

→ Book = Entity = Core object of the library
→ Member = Entity = Person using library service
→ Librarian = Entity = Employee managing library operation
→ Borrowing Transaction = Entity = Records when books are borrowed or returned
→ Reservation = Entity = Reserved book info must store
→ Book Request = Entity = Requests for new books
→ Inventory Record = Entity = Book availability and stock are managed.

Date:

→ Overdue Record = Entity = Overdue book info is tracked

→ Repair Record = Entity = Repair record are stored

→ Book club event = entity = event information is recorded

→ Guest lecture = entity = organized event data is stored

→ exhibition = entity = event details are maintained in record

→ library building = not an entity = physical structure stored are not stored

→ Reading hall = not entity = facility information not required

→ coffee corner = not entity = not relevant to library data

→ computer station = not entity = hardware details are not part of library

→ cleaning staff = not entity = support staff details not required.

Senario 1

Step I

→ The miniworld is the community health clinic system, the part of the real world we want to manage using a database

Step II

entity	Reason
• Medical camp	realworld activity with multiple pieces of information
• Medical supply	physical medical items used in the clinic with important details
• patient	people receiving medical services
• Doctors	people providing health care services

Step III

entity	Attributes
• Medical Camp	Camp Name, Health Services, schedule, registration fees
• Medical supply	item Name, Quantity, cost
• patients	patient ID, Name Age, contact Details
• Doctor	Employee ID, Name, specialization

Date:

Step IV

Entity	Attributi	Datatype	Reason
Medicalcamp	CampName	string	contain words
Medical camp	schedule	Date	date information
Medical camp	Fees	Decimal	fee may include decimals
Medical camp	itemName	string	contain words
Medical supply	Quanity	integer	numeric value
Medical supply	cost	Decimal	cost may include decimals
patients	Id	Int	unique ID
patients	name	string	contain words
patients	Age	int	Age is numeric
Doctor	ID	int	unique ID
Doctor	Name	string	contain letters
Doctor	specialization	string	Describe expertise

Date:

Scenario 2

Step-1

- The miniworld is the language learning institute system

Step II

entity	Reason
course	Academic Activity with multiple info.
learning Material	Educational resources
Student	people enrolled in cources.
Instructor	people responsible for teaching.

Step III

entity	Attributes
course	course title, language type, Duration
learning Material	Material Name, Quantity, cost
Students	student ID, Name, proficiency level
instructor	Employee ID, Name, Teaching specialization

Step IV

Date:

entity	Attributes	DataType	Reason
course	Title	string	describe language
course	type	string	contain words
course	Duration	int	numeric value
course	fees	float	include decimals
learning Material	Name	string	contain words
"	Quantity	int	quantity is numeric
"	Cost	float	include decimals
Student	ID	int	unique ID
Student	name	string	contain letters
Student	level	string	describe level
instructor	ID	int	unique ID
instructor	Name	string	contain letters
instructor	specialization	string	describe level.
